

The Workforce Innovation and Opportunity Act (WIOA) requires that states review their WIOA state plans every two years and update them via a plan modification process. For 2018, states must use the Information Collection Request (ICR) *Workforce Innovation and Opportunity Act (WIOA) Unified and Combined State Plan Requirements* [approved under Office of Management and Budget (OMB) control number 1205-0522] to develop and submit the two-year modification.

Oregon submitted a request to the U.S. Departments of Labor and Education for modification to the state plan. The primary purpose of the plan modification was to comply with the requirements of WIOA, as further defined in *Training and Employment Guidance Letters (TEGL) WIOA No. 6-17 and 9-17 Operating Guidance for the Workforce Innovation and Opportunity Act*.

After review by the U.S. Department of Education, Oregon is making additional changes to the State Plan that:

- Adds new language that clarifies that “eligible providers must be able to demonstrate effectiveness in providing adult education services”;
- Adds new language related to the assessment of professional development activities;
- Adds new language related to the monitoring of local program providers to ensure GEPA compliance
- Adds language to clarify how funds for Title II will be distributed to local providers.
